Subject: Wilcox Update  
Date: Friday, September 09, 2016 2:45:00 PM  
Attachments: [Wilcox02.jpg](#)

Good Day Everyone, I wanted to provide this update along with a couple of resources for documents. We will be out in the field during the weeks of September 12 and 19 to complete ground water sampling, vapor intrusion sampling, Lorraine Refining Well investigation, and reconnaissance of the North Tank Farm, the East Tank Farm and the Creeks. As information comes our way, we will share the data and documents.

1. The draft FSP shared back in July has been finalized with only minor edits to text and tables. A copy via email is forthcoming.
2. The Wilcox Oil Company Web page now has documents available for download: early investigation reports, the draft FSP, the Final Direct Sensing and Geophysics Report, the final Architectural Cultural Report, and the community meeting slides, notes, factsheets. Some of these documents are also on the Wilcox one drive site. For the one drive, you may need to create a user name and password to access.
3. Soil sampling has been pushed to October (weeks 17 and 25) so that we have time to review the passive gas data that was collected in August.

As always, call with an questions.

The screenshot shows the EPA Superfund Program website for the WILCOX OIL COMPANY in Creek County, Oklahoma. The page features a header with navigation links, a main content area with a map and text, and a sidebar with additional information. The text on the page describes the site's history, including its operation from 1952 to 1982, and mentions the discovery of contamination in 1982. It also lists various documents available for download, such as the Draft FSP, Final Direct Sensing and Geophysics Report, and Architectural Cultural Report. The sidebar includes links to the site's history, documents, and a list of documents for download.
